Enterprise Architecture

www.simnet.org

What is the SIM Enterprise Architecture Working Group?

Formed in October 2006, the SIMEAWG is an all-volunteer group of over seventy Enterprise Architecture (EA) practitioners, academics, and thought leaders from nearly 50 industry, government, and academic organizations, dedicated to understanding and improving EA practices, and helping IT professionals and their organizations capitalize on the opportunities of EA.

Our Mission

The mission of SIMEAWG is to:

- Identify and share processes, methods, tools, concepts, and best practices;
- Enable IT organizations to understand, create, and manage EA in partnership with the business;
- Help organizations enhance the way they manage change, reduce complexity, plan, strategize, govern, manage EA projects, and deliver value.

What We Stand For

SIMEAWG is dedicated to the support, promotion, and advancement of the Enterprise Architecture profession through education, research, community involvement, and serving as an information source for the benefit of SIM members and the management community at large.

SIMEAWG believes that:

- EA is a different way of seeing, communicating about, and managing the enterprise and all of its assets, including its technologies.
- EA is key to achieving IT-business alignment and a seat at the organization's management table.
- EA is the essence of IT success: Knowing & communicating the organization's requirements.
- If Business/IT alignment, rapid introduction, complexity reduction, speed, security, and agility are design objectives that answer the question "what do we want it to look like?" then Enterprise Architecture is a critical part of the answer to the question "how do we accomplish it?"

What are the Benefits of SIMEAWG Membership?

SIMEAWG offers opportunities, benefits, and services to its members and their member organizations:

- Exchange experiences and knowledge with other EA professionals.
- Meet and interact with leaders in the EA profession.
- Direct research and publication agenda of the SIMEAWG.
- Participate in writing and publication opportunities of the SIMEAWG.
- Participate as attendee or presenter in seminars, workshops, & conferences.
